Summary

I am a results-driven Full-Stack Web Developer with a passion for creating cutting-edge single-page applications that deliver exceptional user experiences and meet complex business requirements. I have a strong track record of building high-performance web applications using Node.js (Express, Nest), React.js, Angular, Redux, and RXJS. As a collaborative team player, I have worked closely with designers and project managers to deliver successful web projects on time and on budget. I am a hard worker who is focused on problem solving and attention to detail. I am also a self-learner who is quick to adapt to new environments. I am driven by the opportunity to tackle challenging problems and to continually learn and grow as a developer.

Tech Skills

- Vue.js, React, and Angular for building MVC frameworks, single page applications, and PWAs
- Node.js for server-side programming, REST APIs, Sockets, and GraphQL
- Modern JavaScript and TypeScript, including Object Oriented Programming
- MySQL, PostgreSQL, and MongoDB for database management

Education

Web Development Courses

- Full Stack Bootcamp from Coding Academy (4 months)
- Angular - The Complete Guide (Udemy)
- NestJS Fundamentals Course (Kamil Mysliwiec and Mark Pieszak)

3D Graphics Courses

- Three.js Journey (Bruno Simon)

Experience

01/22-Today Oversight: Front-end developer

As a Frontend Developer, I specialized in React and Redux, working with TypeScript. I collaborated closely with Product Managers to ensure business requirements were met, and worked with QA engineers to maintain high standards of quality. My experience has equipped me with the skills needed to deliver top-quality web applications.
